Subject : Application for an internship in the field of software development

Dear Sir or Madam,

I am a student at ESIROI, the Reunion Island and Indian Ocean Engineering School, in the Information Technology and Telecommunications Department. For my second year of Engineering cycle, I have the opportunity to carry out an English-speaking internship from April to August 2022. This is why I decided to take an interest in your company which seems very relevant for my professional career. Actually, Infor is a company that impresses me by the services you offer as well as the variety of sectors in which you operate.

Indeed, by taking Information Technology and Telecommunications, I have developed skills in several areas. I already had the opportunity to do an internship at Logicells, an application software development company. I was able to participate in a project of development of an automated build architecture. On behalf of my project, my internship and my studies in a school of the Commission des titres d'ingénieur (CTI), I can assure you autonomous and self-learning skills in fields. I quickly learn the steps to follow and I will adapt to your pace of work.

This is why I would like to carry out my internship in your company, through my studies, but also due to a growing desire to learn from the best. Thanks to my skills and the rigor demanded of me during my studies, I know that I would be useful in your company and be able to help you with your current projects. I imagine that choosing an intern from Reunion Island may seem overwhelming to you. However, I can take care of the travel from Reunion to New York mainland and support myself once there through student mobility assistance and a scholarship.

Should you have any queries regarding my application, or require any further information, please do not hesitate to contact me. I would like to thank you in advance for your time and consideration.

Yours faithfully,

Baptiste Lebreton.
